

EVERGREEN

drive to the future

TRUCK AND BUS TIRES

PRODUCT CATALOGUE

E+ PES is an advanced technology unique to EVERGREEN tires that works to enhance key areas of driving experience.

POWER EFFICIENCY SYSTEM

LONGEVITY

EVERGREEN improves tire durability and wear resistance, reduces potential structural risks during use, and maximizes the value of tyres, therefore extending the mileage of the tires and reducing tire replacement expenses. Our tires feature Responsive Stress Distribution Technology (RSDT), High Conductive Frame Structure (HCFS), and Ultra Anti-Wear Tread Formula (UAWTF) for greater longevity.

TOUGHNESS

The outstanding toughness of EVERGREEN tires can assist drivers and truck owners in even the most challenging of work environments, as it was developed with a series specialized features made to withstand severe conditions.

CONTROL

As the only contact area between vehicle and ground, the tire is a of driver control. Using specially developed technologies such as Tread and Shoulder Reinforcement Technology (TSRT), Optimized Contact Area Technology (OCAT), and Uniformity and Dynamic Balance Improve Program (UDBIP), our tires were made to optimize controllability.

GREEN

Sustainability is the core of EVERGREEN. In order to do our part in protecting the earth and lowering fuel consumption, we use Nano Silica Uniformity Tech (NSUT), Evergreen Manufacturing Programs (EMP), Ternary alloy wire (TAWI), a Vulcanizing Activator With Low Zinc Content (VALZ), and Low Hysteresis Carbon Black (LHCB) to reduce our carbon footprint.

SAFETY

Safety is the most important quality of any product. To protect our customers, Evergreen has put in place numerous guidelines to ensure each that EVERGREEN tire is safe. Even in more extreme conditions, our Anti aquaplaning pattern design (AAPD) ensures you safety on wet and icy surfaces.

EVERGREEN, DRIVE TO THE FUTURE

We only have one Earth, and every individual must do their part to in caring for it.

EVERGREEN takes this commitment seriously. The spirit of environmental sustainability is embedded in all the tires we make.

We believe in doing our part to protect the world's limited resources by developing tires in a sustainable, responsible way to ensure the health and wellbeing of our future generations.

SERIES	ICON	APPLICATION
LineRoute		<ul style="list-style-type: none">• Long-range travel with consistent speed and less braking or accelerating.• Well paved road surface with fewer curves.
MultiRoute		<ul style="list-style-type: none">• Journeys with repeated braking, acceleration, and turning.• Well-paved road with curves and occasionally rough conditions.

Features

Advanced silica-rich cap and base compounds

Optimized 5-rib cap design with optimal pressure distribution

Enhanced 4-belt construction design

Increased tread width and contact surface area

Stone ejection system with waved grooves

Benefits

- ▶ Provides longer tire life with excellent fuel efficiency and wet grip
- ▶ Provides good steering stability, high mileage and even wear.
- ▶ Maximum safety and retreadability
- ▶ Extended wear life and mileage potential
- ▶ Eliminates stone retention for extended tire life

LineRoute EDL12

EDL12 is the drive tire for long haul operations with excellent anti-wear, grip, and durability performance.

LineRoute EDL12

Features

- High rigidity pattern with 3D-sipes design
- Excellent compound formula
- Wide tread blocks
- Well designed W-shape groove

Benefits

- ▶ Provides excellent traction and low rolling resistance with lower deformation in rotation
- ▶ Promotes great anti-wear and cool-running performance
- ▶ Deliver an optimized footprint with even wear performance and extended tire life
- ▶ Minimizes stone retention for longer tire life

Features

Stone ejection system with waved grooves

Novel hexagonal pattern block design

Upright design on the tire shoulders

Enhanced carcass with the UHT material

Benefits

► Helps keep stones from becoming lodged in tires, prolonging tires lifespan.

► Reduce driving noise and increase comfort

► Provides cornering stability and keeps safe at high speeds

► Provides even pressure distribution, and excellent load-carrying capacity

MixWork EDM60

EDM60 offers superior durability, traction and longevity in off-road conditions, as well as high mileage on-road.

CONTROL

TOUGHNESS

LONGEVITY

MixWork EDM60

▲ Recommend

Features

- Directional deep tread design
- Optimized tread compound
- Integrated continuous tread blocks
- Enhanced bead and sidewall protection
- Robust 4-belt construction

Benefits

- Provides better traction and exceptional grip in rough terrain conditions
- Provides excellent protection against tread cuts and chips
- Provides excellent on- and off-road wear performance and extra tread durability
- Improves durability and increases tire damage resistance
- Protects tires from squirm and irregular wear to maximum retreadability and longevity

Features

Innovative tread pattern design with central tie-bar and deep lateral lugs

Reinforced bead and structure

The stone-ejector design

Enhanced carcass with the UHT material

Benefits

► Provides excellent on- and off-road traction and wear performance

► High-capacity transportation

► Eliminates stone retention for extended tire life

► Maximizes service life in demanding mix work condition

MixWork EDM629

- ▶ The deep lug pattern design contributes to outstanding performance on the severe road surface.
- ▶ High-strength carcass cords provide excellent durability performance.
- ▶ Thickened all-steel belt structure provides excellent anti-puncture performance.

MixWork EA828

- ▶ Optimized tread design adapts the tire to all axle positions and can be used in most of the road conditions.
- ▶ Specialized rubber formula in the shoulder utilizes the heat-releasing performance.
- ▶ The carcass structure minimizes the deformation and contributes to high durability.
